

Project Title: Measured Term Responsive Building Maintenance for North Yorkshire County Council

Client: Jacobs UK

Project Details:

Under this framework agreement we provide reactive maintenance throughout the County of North Yorkshire which covers approximately 2 million acres. This framework is for the provision of responsive building maintenance works incorporating a 24 hour, year round call out service across 900 establishments owned or managed by the Council. The work is predominantly maintenance to the fabric of buildings plus plumbing and electrical faults to schools, Government Buildings, EPH's and libraries etc. We manage and operate this contract from 3 regional offices based in Northallerton, Scarborough and Harrogate and have a fully integrated IT solution providing up to the minute information on the operatives location, jobs pending and jobs completed using PDA hand held technology. With this technology we can guarantee a 2 hour response anywhere in the County. All our technicians are multi skilled and have fully security clearance including enhanced CRB checks.

Duration: 3 Years (Commencing April 2011)

Value: £3.5m per annum
